Shubham Prasad Padhi

+91 7303213319 | padhishubham@gmail.com | LinkedIn | GitHub

Education

Delhi Technological University — **Delhi, India**
B.Tech in Mathematics and Computing — *2023 – 2027*

Sahoday School — **Delhi, India**
Class XII (CBSE) — *2022*

Professional Experience

Outlier AI — **Remote**
Freelance Quality Assurance Contributor — *June 2026 – Present*

- Evaluated outputs from multiple frontier large language model projects, including OpenClaw, Atlas, and Aether, assessing factual accuracy, logical reasoning, and instruction-following quality across hundreds of model responses.
- Conducted structured prompt evaluation and comparative response ranking, applying evolving evaluation rubrics with high consistency across large-scale review cycles.
- Delivered detailed, structured feedback and annotations that directly informed model alignment improvements and response-quality gains for production LLM systems.
- Collaborated within a distributed, cross-functional QA workflow to standardize evaluation criteria and maintain consistency across hundreds of concurrent reviewers.

Technical Skills

Languages: Python, SQL, Java, C++
AI & Machine Learning: Generative AI, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Prompt Engineering, Scikit-learn
Cloud & Data Engineering: AWS, ETL Pipelines
Databases: MySQL, PostgreSQL, Vector Databases
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

Projects

Ask-the-Web – AI Research Assistant | *Python, FastAPI, LangGraph, RAG, Vector Database, LLM APIs*

- Architected a multi-agent AI research assistant using Python, FastAPI, and LangGraph to orchestrate query planning, retrieval, and multi-step reasoning workflows.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline backed by a vector database, enabling semantic search across trusted web sources with improved retrieval relevance.
- Engineered a citation-generation module to ground LLM-generated responses in verifiable sources, improving factual accuracy and end-to-end response traceability.
- Designed and shipped backend REST APIs supporting end-to-end query handling, from user input to context-aware, cited responses.

Machine Learning for Automotive Safety | *Python, PyTorch, OpenCV, Computer Vision*

- Developed a real-time object detection pipeline for Advanced Driver Assistance Systems (ADAS) using PyTorch and OpenCV for perception tasks.
- Evaluated large-scale automotive datasets to benchmark detection performance across diverse driving scenarios and edge cases.
- Analyzed perception failures in safety-critical scenarios and translated findings into structured validation reports for stakeholder review.
- Applied computer vision techniques to improve detection robustness across varying lighting and environmental conditions.

Leadership

SIAM DTU — **Delhi, India**
General Secretary — *2025 – 2026*

- Directed planning and execution of technical events as General Secretary, leading cross-functional teams and student volunteer groups.
- Organized hackathons and workshops, coordinating logistics, scheduling, and stakeholder communication across departments.
- Managed and mentored volunteer teams to ensure consistent delivery of a full annual calendar of technical events.

Certifications

AWS Data Engineering Professional Certificate (Coursera)
Microsoft Power BI Data Analyst Professional Certificate
IBM AI Product Manager Professional Certificate

Achievements

Top 10 Finalist – Google PromptWars AI Competition (Top 10 among 500+ participants)
Secured 98.5 Percentile in JEE Main
